

ALVYN DUY-KHOI LE

SOFTWARE ENGINEER

Montreal, Canada · alvyn279@gmail.com · 514-578-4643 ·
Portfolio · GitHub

EDUCATION

Concordia University **August 2016 - May 2020**
BEng Software Engineering Co-op, graduated *with Distinction*

WORK EXPERIENCE

Amazon Web Services (AWS) **June 2020 - September 2020**
Software Development Engineer Intern - AWS Insights

INEAT Canada Inc. **May 2019 - January 2020**
Full Stack Developer Intern

- Developing core visuals and REST API interactions for a mobile application in React Native integrated with Redux
- Acted as primary contact point for the maintenance and deployment of existing iOS and Android solutions used by hundreds of clients daily

Ericsson **May 2018 - August 2018**
Software Developer Intern - MediaFirst Delivery Node

- Refactored the team's in-house API by reducing code duplication in Shell scripts and reinforced coverage of the Java functional testing framework

Ericsson **January 2018 - May 2018**
Software Developer Intern - License Management

- Developed and improved core features for a Django web-based application serving as tool for the continuous integration and testing of the License Management software

SKILLS

Programming Languages:	Java, Python, JavaScript (ES6), TypeScript
Frameworks:	React, Django, Redux, React Native, MongoDB, HTTP REST, AWS
Courses:	Design Patterns, Object-Oriented Programming, Data Structures

OPEN-SOURCE CONTRIBUTIONS

GitHub Repositories: AWS Cloud Development Kit (CDK)

PROJECTS

Graphelier - *React (TypeScript), MongoDB, Go, AWS, Flask*

With Squarepoint Capital as a stakeholder, developed an open-source visualization tool used to compress gigabytes of market data into a fast, responsive, and compact interface.

AntennaPod - *Java, Android, Django*

Forked off a robust open-source Android mobile application and enhanced it with new features such a Python REST API to service a user authentication system.

WarHacks 2019 - *Node, AngularJS, MongoDB, AWS EC2, S3, SES, Lambda*

As the webmaster, developed an application for the registration of participants to WarHacks 2019, a hackathon held for approximately a hundred CEGEP students.

Developed features such as a serverless function with Lambda to redirect incoming public email traffic to a single mailbox and a microservice to handle the distribution of text messages from a dashboard to the users of the system.

AWARDS

Concordia ENCS Entrance Scholarship **August 2016**
Awarded to first-year students with exceptional academic standings in CEGEP
